## SUN PRAIRIE ELEMENTARY SCHOOLS: Token Springs Elementary School 02/16/2018

### What's New?

Token Springs Elementary School is going through a lot of changes lately. Painting is finished in the 2<sup>nd</sup>/3<sup>rd</sup> grade wing, so now ceiling grid is being hung and casework is being installed. Over in the 4<sup>th</sup>/5<sup>th</sup> grade classroom wing, drywall is being put up and the tapers can head over there next week. The stairwell that is in the 2<sup>nd</sup>/3<sup>rd</sup> grade wing was installed this week, and now there is only one more stairway that needs installation! Masons have been busy finishing the block wall for the kitchen area and building the block wall for the 2<sup>nd</sup> floor restrooms and art room. Outside, the metal panels are being installed, bringing the school closer to looking complete!

### The Past Weeks

- Finished building block walls for the kitchen area and installed the kitchen hood
- Sprayed fireproofing on the structural steel and concrete in the ELRC
- Hung ceiling grid in 2<sup>nd</sup>/3<sup>rd</sup> grade wing
- Finished painting the 2<sup>nd</sup>/3<sup>rd</sup> grade wing

### Coming Up in the Weeks Ahead

- Steel stud framing and drywall installation in the ELRC
- Continue installing metal paneling on the exterior of the building
- Casework has arrived and will be installed in the coming weeks
- Masons are building the walls for the second floor bathrooms
- Elevator installation has started and will be completed in 2 weeks!

The metal panels are going up nicely, adding a sleek look to the building!

Painting is finished in the 2<sup>nd</sup>/3<sup>rd</sup> grade wing! Now ceiling grid is being hung and casework is being installed.

Even a couple of geese couldn't avoid the opportunity to get a glimpse at how nicely the school is coming along!

**Did you know?** In all public buildings, many measures are taken to ensure fire safety and fire prevention. This week at Token Springs, a fireproof foam was applied to the structural steel and metal deck in the ELRC. The foam looks like paper-mâché, but it's actually a chemical compound comprised of silica and calcium sulfate. It reduces the thermal conductivity of the columns and ensures that they do not get hot enough for the fire to keep burning!

## SUN PRAIRIE ELEMENTARY SCHOOLS

02/16/2018

---

*There has been a lot of progress in the 4<sup>th</sup>/5<sup>th</sup> grade wing in the last two week. The drywallers are finishing up, and the wing will be ready to be taped soon!*

*The crew has been busy laying steel studs in the ELRC and shaping the classrooms. Next up is the plumbing, electrical and duct work.*

*To keep the building compliant with fire code, the crew applied a fireproof foam in the ELRC this week.*

*Over in the 2<sup>nd</sup>/3<sup>rd</sup> grade wing, our ironworkers installed the school's 3<sup>rd</sup> stairwell!*
